Technical Data Bulletin TD-236

- **Product Name**

Mr. Eats-It Floor Adhesive Remover

- **Company**

Microbial Restoration Services, LLC  
16950 W. Sibelius Ln  
Gurnee, IL 60031

- **Product Description**

A powerful microbial based solution for removing floor adhesives.

**Key Features:**

- Softens and liquifies adhesives to easily be scraped off.
- Removes floor adhesives in one application
- Microbes that eat floor adhesives
- Zero VOC's
- Does not need to be neutralized
- Complete jobs 75% faster than traditional adhesive removers
- Able to complete large jobs with just one person
- Does not leave chemical residue

- **Application Instructions**

- Read entire label before opening and shake well before using
- Mr. Eats-It Floor Adhesive Remover is ready to use upon opening
- Remove all floor coverings and loose debris from floor surfaces to be treated

- Wet floor with water using a pump-up sprayer
- Using a pump-up sprayer apply adhesive remover in a back-and-forth motion, overlapping the previously sprayed area.
- Use a stiff broom, deck brush or floor scrubber with bristle brush to agitate entire area for 10-15 seconds
- Allow to penetrate 20-30 minutes or more depending on the thickness agitating occasionally. Keep the surface wet during the process.
- Let the Adhesive Remover do the work.
- Test for effectiveness. The floor adhesive should scrape off easily when ready to remove.
- When ready, remove adhesives with razor scrapers or carbide scrapers on a rotary or planetary grinder.
- Cover with plastic in windy areas or when leaving areas for extended periods of time to avoid area drying out.
- If the adhesive remover dries out rewet with water and reapply Mr-Eats-It Floor Adhesive Remover and agitate.
- Dispose of all waste and rinse the floor thoroughly with clean water and allow to completely dry.
